

Annual Evaluation Data Report to the Governance Council: Follow up Data Analysis

Wraparound Fidelity: Splitting the Data (A versus B Level of Achievement)

This is the first in a series of several reports that are being created as follow up to the Annual Data Report to the Governance Council evaluation presentation that occurred at the Governance Council meeting in October 2007. *The topic presented was requested by a Governance Council member during the discussion portion of the presentation.*

Annual Data Report: combined “A” and “B” level indicators of Wraparound fidelity into one score. The score reveals the percent of time that the indicator was observed by the data collector.

Requested Change Presented Below: “A” level of achievement for Wraparound fidelity indicators have been split out (where applicable) such that they can be observed on their own.

“A” level indicators are bolded.

“B” level indicators are not bolded.

Wraparound Fidelity (n = 25)		
ChIPP Indicator	% YES for both A and B levels	% YES for A level only
Key members of the team are present from start to end of meeting* , or for sufficient portions of the meeting.	28	4
